

I am writing to ask that the FCC reject the National Association of Broadcasters' petition to stop XM Radio from providing XM Instant Traffic and Weather. The satellite radio traffic and weather channels run continuous updated reports, which I am not able to receive on local channels without the interruption of advertisements and local chatter. This is a service satellite radio customers choose to pay for, and should not be taken away because local stations and the NAB can't or don't want to compete with satellite radio's superior service.
